DETAILED ACTION

Election/Restrictions

1. Claims 1-11 are withdrawn from further consideration pursuant to 37 CFR

1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/28/04.

Claim Objections

2. Claim 12 is objected to because of the following informalities:

Claim 12, line 9-11, the limitation, "a collar oxide layer, formed on sidewalls of the top of the deep trench, the substrate at sidewalls of the top of the deep trench exposed" is confusing.

Claim Rejections - 35 USC § 102

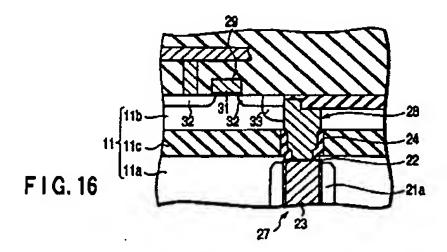

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsubara (US 2002/0195636).

Application/Control Number: 10/707,113

Art Unit: 2831

Matsubara discloses in fig. 16, a deep trench capacitor comprising": a substrate (11), having a deep trench therein, a doped region (21a), formed within the substrate at the bottom of the deep trench, a capacitor dielectric layer (22), formed on the surface of the bottom of the deep trench, a first conductive layer (23), formed over the capacitor dielectric layer, a collar oxide layer (24), formed on sidewalls of the top of the deep trench, the substrate at sidewalls of the top of the deep trench exposed, and a second conductive layer (26, 28), formed within the deep trench, covering the first conductive layer and the collar oxide layer, the second conductive contacting substrate at the sidewalls of the top of the trench.

Regarding claim 13, Matsubara discloses the material of the first conductive layer is a polysilicon (paragraph 40).

Regarding claim 14, Matsubara discloses the material of the second conductive layer is a polysilicon (paragraph 47).

C nclusion

In order to ensure full consideration of any amendments, affidavits, or declaration, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be a final action, will be governed by the requirements of 37 CFR 1. 116 which will be strictly enforced.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

2004/0036100 A1 - discloses a trench capacitor having a doped region.

6,667,503 – discloses a semiconductor trench capacitor having doped region.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric W Thomas whose telephone number is 571-272-1985. The examiner can normally be reached on M,Tu,Sat 9 am - 9:30 pm; W, Th, F 6 pm -10:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-1984. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2831

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
